Experience

3 Months

WallSoft Technologies

Internship

Built and updated responsive web pages using HTML , CSS , and JavaScript during personal and practice projects. Focused on React.js to develop dynamic and interactive user interfaces. Collaborated with designers or followed UI/UX designs to implement clean and user-friendly layouts. Gained hands-on experience with state management using Context API and Redux . Explored TypeScript in several projects to improve code structure, readability, and maintainability. Actively identified and resolved front-end issues to enhance UI performance and overall user experience.

5 Month

WallSoft Technologies

Junior Software Developer

Developed and maintained responsive front-end screens for an HR & Payroll Management System using HTML5, CSS3, Bootstrap, Tailwind CSS, and JavaScript. Implemented clean, structured, and user-friendly UI layouts within the ASP.NET MVC architecture. Integrated front-end components with C# MVC controllers to display, submit, and update payroll and employee data. Worked on modules such as employee profiles, attendance forms, salary calculations, and data entry pages. Ensured cross-browser compatibility, mobile responsiveness, and consistent UI styling across all system pages. Debugged and fixed front-end issues to improve system workflow, UI performance, and user experience. Collaborated with team members to understand functional requirements and translated them into practical, workable UI implementations. Used Git and GitHub for version control, managing code updates, and collaborating on project tasks.

Certificate

- FULL STACK WEB DEVELOPER (01/2024 - 10/2024)
SAYLANI MASS IT TRAINING

Interest

- Exploring new web technologies
